**You can add burrata
to any pizza – 290P**

We opened our first pizzeria in 2015 and were the first to introduce pizza «napoletana» to St. Petersburg.

To prepare the dough, we use only four classical ingredients: flour, yeast, salt and water. The dough is fermented for at least 24 hours, that makes it easier to digest, lighter and more airy.

Pizza has a «leopard color» – which is formed from the contact of the dough with fire.
